Businesses **With** Enterprise Systems

2.6%
Worked Poorly
33.3%

Worked Perfectly
7.7%

Worked Well
56.4%

Today many applications are available in silos to cater to the need of the organisation but unfortunately most of these solutions run standalone and information comes in bits and pieces.

- Lack of Integration

- Lack in data Integration

- Low transparency

- Low reliability

- Replication need to be done manually

- Non-Centralized resulting in Issues related to Architectural distribution
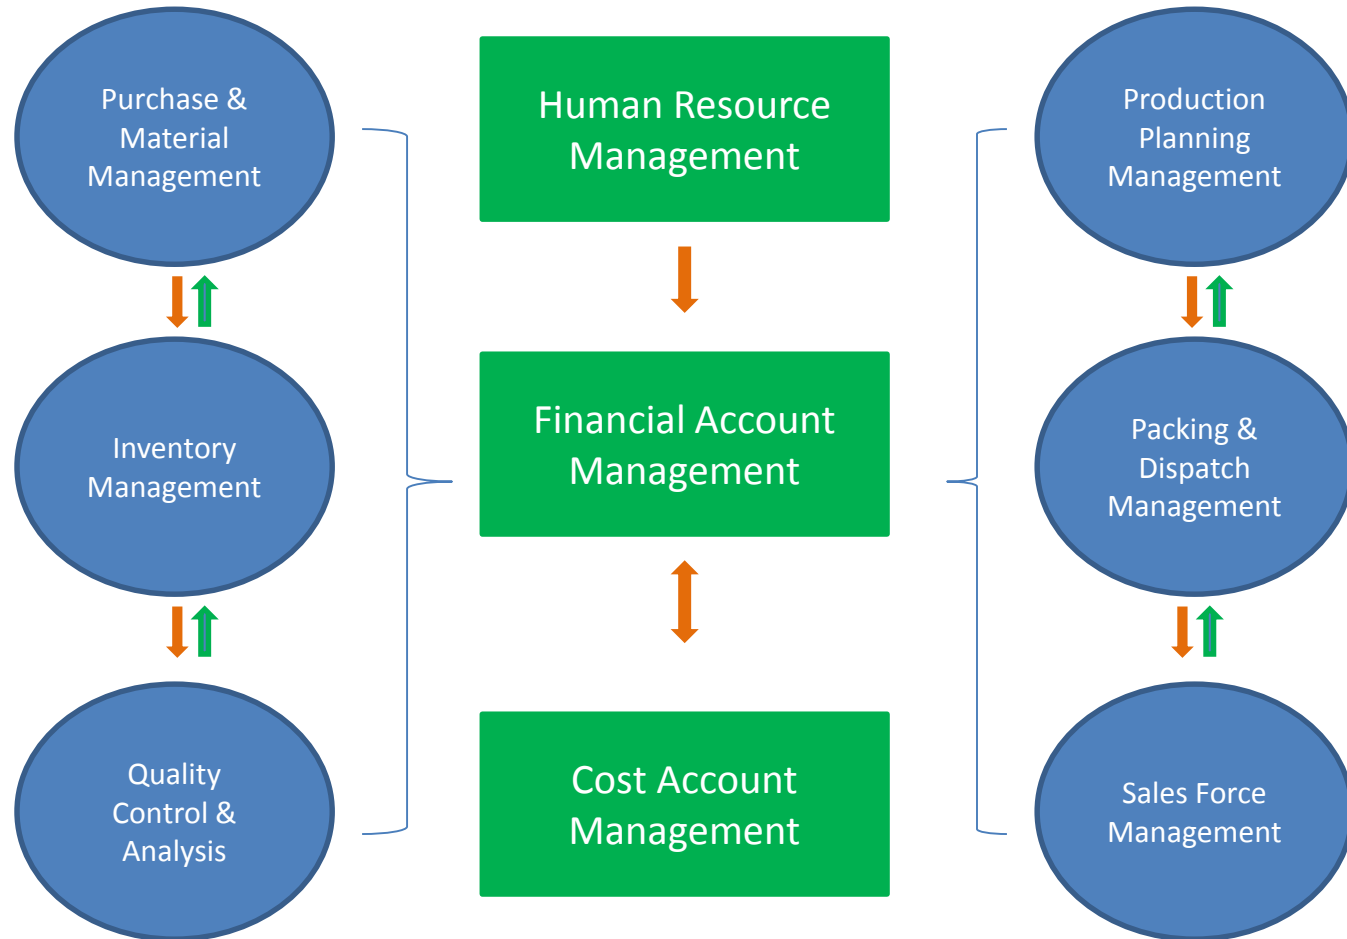

- Microsoft Software - .Net, Java, SQL latest tech.

- New Three-tier Architecture & MVC

- New Reporting functionality

- Web services with secured system

- Mobile Apps

- System Study with overall integration

- Design & Development

- Implementation & perfect training

- Quality maintenance & complete support

- Global access privileges

P&G - ERP
PERFECT SYSTEM

Purchase & Material Management

Human Resource Management

Production Planning Management

Inventory Management
